

# Mystery Easter Colour by Numbers

## Instructions for the Addition Colour by Numbers

In this activity, you'll reveal a surprise Easter image by solving addition problems. Here's how to do it:

**1. Find the solutions:** The grid in front of you is filled with different math problems. Use mental math to solve each mathematical operation.

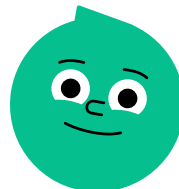

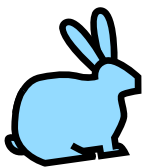

**2. Check the colour key:** Every answer corresponds to a specific colour. Colour key:

- If the answer is **15**, colour the square **black**.
- If the answer is **12, 16, 20, 24, 32, 35, 40, or 44**, colour the square **green**.
- If the answer is **28**, colour the square **yellow**.
- If the answer is **50**, colour the square **pink**.
- If the answer is **14, 26, 30, 36, 38, or 48**, leave the square blank.  
Tip: Draw an **X** next to these problems in pencil after you solve them to keep track of your progress.

► Remember, it's important to be accurate so the Easter picture looks just right!

**3. Admire your work:** Once all the squares are coloured in, take a moment to admire the cute Easter design you've revealed thanks to your addition skills.
