

Mystery Easter Colour by Numbers

Instructions for the Division Colour by Numbers

In this activity, you'll reveal a surprise Easter image by solving division problems. Here's how to do it:

1. Find the solutions: The grid in front of you is filled with different math problems. Use mental math to solve each mathematical operation.

2. Check the colour key: Every answer corresponds to a specific colour. Colour key:

- If the answer is **2** or **4**, colour the square **red**.
- If the answer is **3**, colour the square **green**.
- If the answer is **5**, colour the square **brown**.
- If the answer is **6, 7, 8, 9, 10, 11, or 12**, leave the square **blank**.
Tip: Draw an **X** next to these problems in pencil after you solve them to keep track of your progress.

► Remember, it's important to be accurate so the Easter picture looks just right!

3. Admire your work: Once all the squares are coloured in, take a moment to admire the cute Easter design you've revealed thanks to your division skills.
