

Mystery Easter Colour by Numbers

Instructions for the Multiplication Colour by Numbers

In this activity, you'll reveal a surprise Easter image by solving multiplication problems. Here's how to do it:

1. Find the solutions: The grid in front of you is filled with different math problems. Use mental math to solve each mathematical operation.

2. Check the colour key: Every answer corresponds to a specific colour. Colour key:

- If the answer is **12**, colour the square **grey**.
 - If the answer is **24** or **18**, colour the square **light blue**.
 - If the answer is **15**, colour the square **pink**.
 - If the answer is **16**, colour the square **black**.
 - If the answer is **36**, **48**, or **72**, leave the square **blank**.
- Tip: Draw an **X** next to these problems in pencil after you solve them to keep track of your progress.

► Remember, it's important to be accurate so the Easter picture looks just right!

3. Admire your work: Once all the squares are coloured in, take a moment to admire the cute Easter design you've revealed thanks to your multiplication skills.
