

# Mystery Easter Colour by Numbers

## Instructions for the Subtraction Colour by Numbers

In this activity, you'll reveal a surprise Easter image by solving subtraction problems. Here's how to do it:

**1. Find the solutions:** The grid in front of you is filled with different math problems. Use mental math to solve each mathematical operation.

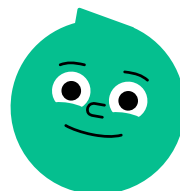

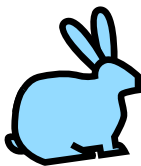

**2. Check the colour key:** Every answer corresponds to a specific colour. Colour key:

- If the answer is **0**, colour the square **black**.
  - If the answer is **1, 2, 3**, or **7**, colour the square **yellow**.
  - If the answer is **11**, colour the square **pink**.
  - If the answer is **12**, colour the square **orange**.
  - If the answer is **4, 5, 6, 8, 9**, or **10**, leave the square **blank**.
- Tip: Draw an **X** next to these problems in pencil after you solve them to keep track of your progress.

► Remember, it's important to be accurate so the Easter picture looks just right!

**3. Admire your work:** Once all the squares are coloured in, take a moment to admire the cute Easter design you've revealed thanks to your subtraction skills.
