

# The Allomarket

2 to 6 players

## Objective

You win when you've completed your grocery list!

## Rules

### Directions:

- Print out the document
- Glue each sheet on a piece of card stock to make the cards sturdier
- Cut out the cards and lists

### Setup:

- each player starts with \$8.80:
    - $6 \times 0,25 \$$
    - $2 \times 2,00 \$$
    - $3 \times 1,00 \$$
    - $2 \times 0,10 \$$
    - $2 \times 0,05 \$$
  - shuffle the product cards
  - place the product cards facedown
  - shuffle the money cards
  - put the money cards in a pile on the game board (this is your cash box)
  - randomly give each player a grocery list
- 1) The first player turns over two grocery item cards, like in a memory game.  
Based on these cards, the player can do one of two things:
- **Buy both items and remove them from the store**, but only if both items are on their grocery list\* AND they have enough money to buy them. The player must pay the exact amount. No trades allowed.
  - **Turn the item cards back over and wait for their next turn** if neither, or only one of the items, is on their list. The player can also opt not to buy, even if their list includes both items.

2) At the end of their turn, the player chooses another card at random.

*\*You can only purchase the items on your grocery list.*

**Note:** Money cards with a star are wild cards—a bit like Jokers—and can have any value.
