for more resources.

Objective

You win when you've completed your grocery list

Material

- Money tokens
- Grocery list cards
- Product cards

Rules

Directions:

- Print out the document
- Glue each sheet on a piece of card stock to make the cards sturdier
- Cut out the cards and lists

Setup:

- Hand out \$8.80 to each player with these Money tokens:
2 × \$2 3 × \$1 6 × ¢25 2 × ¢10 2 × ¢5
- shuffle the Product cards
- place the Product cards facedown
- shuffle the Money tokens
- put the Money tokens in a pile on the game board (this is your cash box)
- randomly give each player a Grocery list

1) The first player turns over two Product cards, like in a memory game.

Based on these cards, the player can do one of two things:

- **Buy both items and remove them from the store**, but only if both items are on their Grocery list* AND they have enough Money tokens to buy them. The player must pay the exact amount. No trades allowed.
- **Turn the Product cards back over and wait for their next turn** if neither, or only one of the Products, is on their list. The player can also opt not to buy, even if their list includes both Products.

2) At the end of their turn, the player picks a random Money token from the cash box.

3) It's the next player's turn to play.

Note :

- Money tokens with a star are wild cards and can have any Money token value.
- You can only purchase the products on your Grocery list.
