## Steps

1. Tape the two toilet paper rolls together end to end.

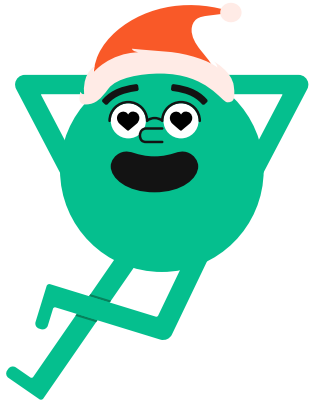

2. Cover the roll with a piece of wrapping paper of your choice. Leave between 5 cm and 10 cm of wrapping paper at each end.

3. Secure with tape.

4. Using the tip of a pair of scissors (or a needle), poke small holes in the paper all the way around the roll, where the two rolls meet. This way, the cracker opens more easily when pulled.

5. Cover the perforated area with a strip of wrapping paper to hide it.

6. Tie one end with string or ribbon.

7. Place the contents of the cracker inside.

8. Tie the other end with string or ribbon.
